

Quartz microfiber filters ref.CQ2000

Analysis of emission with aggressive gases or very high temperature

APPLICATIONS

- Control of emissions in industrial smokestacks with isokinetic probes or temperatures up to 900°C.
- Gravimetric calculations in gases.

Metal traces (ppm)

Description

Made with pure (SiO₂), quartz microfibers completely free of bonding agents and later treated at high temperatures. Quartz fiber thimbles have enjoyed high demand over the last years due to the growing social concern over atmospheric contamination and the environment in general.

They have the same properties as quartz microfiber filters but its thimble the format makes it specially indicated in controls of emission in industrial smokestacks by means of isokinetic probes. Are also used for the retention of dust particles suspended in gases, aerosols, or generally in any analysis where a thimble resistant to high temperatures (up to 900°C) or chemically compatible with gases where high acid concentration is required (except HF)

Technical specifications

Ref.	Composition	Retention % a 0.3 µm	DOP Penetration % a 0.3 µm	Max. Temperature	Binders
CQ2000	Quartz microfiber	99.998	< 0.002	900°C	No
